Sensa | Protected Natural Stone

SENSA
by COSENTINO

Sensa® Limited 15-Year Transferable Residential Warranty

CONCEPT

SENSA® is a range of specially selected high-quality natural stones, with a special protective shield that improves its performance against stains.

We have applied the latest technology to the natural beauty of natural stone, improving the product's performance without altering its look or feel - the treatment is invisible. Beauty and functionality, all rolled into one.

In addition, the product does not alter over time, and requires no future treatment. Thanks to the protection, your surface will keep its original appearance day after day.

SENSA® TREATMENT

Sensa® Granites and Quartzites come with a protective treatment to reduce absorption and thus reduce its susceptibility to staining. The treatment is not a sealer - it bonds to the surface of the stone in a different way from conventional sealers.

In contrast to sealing products, the treatment allows the stone to breathe, penetrating and anchoring to its structure, conserving its colour and natural beauty.

ADVANTAGES OF THE TREATMENT

- Water and oil repellent
- Invisible
- No need to re-seal after the initial application
- Chemical bonding to the stone, allowing it to breathe
- Long-lasting
- Unaffected by conventional cleaning products
- No deterioration from UV exposure
- Withstands temperatures of up to 150°C (302°F)

PRECAUTIONS

- Do not place very hot objects directly onto the work surface. The use of a heatproof mat is recommended to avoid marking the stone.
- Any spillage on the work surface should be cleaned up as quickly as possible.
- Cutting directly on the work surface should be avoided, as it can cause scratches.
- Do not use highly abrasive cleaning materials such as metal scourers.
- Wipe the surface gently to avoid scratching.
- Do not use strongly acidic or basic cleaning products, as they may damage the surface.

MAINTENANCE

The Sensa® treatment means that almost no maintenance of the stone is required. It is highly stain-resistant. To keep the surface just like it was on the first day, it must be cleaned regularly using a few drops of a neutral cleaner or a gentle washing-up liquid.

The best results are obtained wiping gently by a cloth dipped in warm water to avoid scratching the work surface. After cleaning, rinse with water and dry the surface.
